	04	cloud	Fast, flexible and secure
	05	managed services	Secure, professional, fast, 24/7

# firstcolo – A true partner for IT services

These days, a company's success hinges on high-performance, reliable, secure IT.

But it isn't always economically sensible or even feasible to have all the necessary resources in-house. That's when you need a strong partner – a partner like firstcolo.

---

#### **Our philosophy**

We strive to provide our customers with the very best possible service. That's the heart of our business philosophy, and it shows in everything we do. Right from the very first consultation, we perform a solid analysis and provide customized concepts to save you money and prevent problems before they even arise. We also know that a data center is something you need to be able to count on in the long term. That's why we think beyond the next quarter and even the next fiscal year, focusing on sustainable growth. Our success shows that we are on the right track. We are currently logging solid double-digit annual growth – and doing it without a lot of turnover, since satisfied customers are loyal customers.

---

#### **By your side – right from the start**

Outsourcing IT resources is a big step for any company, and one that requires detailed planning. That's why we support you starting with the conceptualization phase. This way, both of us can ensure together that all your requirements and wishes are taken into account. We have been in business for nearly 20 years, proving and growing our capabilities in a wide range of projects over that time. This allows us to do more than just guarantee a highly available infrastructure that meets your needs. Our outstanding technical points of contact are here to help with whatever you may need, 24/7.

# What we offer

## **Our services**

In addition to classic colocation services, firstcolo GmbH offers a wide range of additional services that allow you to focus on your business model. Benefit from our high-performance network with its own fibre optic ring through Frankfurt, from our first-class managed services and monitoring services, from the 'firstcloud' cloud platform with guaranteed data location in Germany or from our dedicated server offerings with connected storage and backup solutions.

Whether you need best practice solutions or customised solutions tailored to your individual requirements, at firstcolo, you get everything from a single source.

Benefit from our expertise!

## Looking ahead to the future

The IT market is a fast-paced one. The sheer volume of emerging technologies means that data center operators have to keep one step ahead at all times.

In our role as an IT service provider with a focus on managed services, our goal is to be a strong partner to our customers in the long term – including, and especially, as new technologies arise, bringing new requirements with them. And, of course, we do it all with a commitment to excellent value for the money.

## **Expertise is our business**

We set high standards for ourselves, performing all our tasks accurately, securely and efficiently.

That's why our technicians are prepared and trained for all requirements in the area of servers and infrastructure.

And if there's ever a time when we don't have the right specialist on the team for a specific job, we have an extensive pool of experts who have been working with us for years.

# firstcolo – the company

Founded in 2004, firstcolo is now a high-performance IT service provider for anything and everything in the field of servers and networks, with two data center locations in Frankfurt am Main. We have been building a record of success on the market for nearly two decades now – with rapid growth right from the start. What's our secret?

We focus on consistency: from using the most advanced and most efficient technologies to continuously expanding on our capabilities and unlimited flexibility and through to a rigorous focus on the customer and on service.

---

### **What drives us**

The Internet is the beating heart of the economy – and our lives. More and more products and services are moving online. Having a website is an integral part of the business model of practically any company today. Thanks to cloud computing, we can access our data from anywhere in the world. But a digital society has to be able to rely on the IT infrastructure to be available at all times.

---

### **Our vision**

Total security for our customers is our stated goal. Our services need to stand up to even the most exacting demands – effortlessly, and around the clock. That's why we make sure our customers can reach us at all times. We are always here for you with advice and practical assistance. We believe outstanding service and a rigorous focus on the customer's well-being in every decision we make are part of any data center operator's obligations.

---

### **We take action for the environment**

Data centers use a lot of energy. We get ours from renewable sources wherever possible and take the carbon footprint into account in all our decisions. We make every effort to lower our energy use as much as possible through innovation. This helps us live up to our responsibility to society and actively help to protect the environment.

# What you can expect from us and our services

## We offer customized concepts

Individual solutions instead of one-size-fits-all IT

---

## We think innovatively

Our vibrant, committed team will find the right solution for you – including, and especially, outside the box.

---

## We hold ourselves to the very highest standards

That goes for both execution and results.

---

## We use time efficiently

Specialists execute tasks much faster than generalists.

# Benefits

## Cost effectiveness

Rapid implementation goes easy on your budget and shortens time to market.

## Preventing bottlenecks

You can always add further services and service levels to an existing order.

## Streamlined communication channels

One point of contact, one interface – clear and transparent communication across all processes.

## Accuracy

Experts make fewer mistakes.  
It's just that simple.

# We're continuing to grow...

Experience future technology: Our greenfield data centre in the Frankfurt area will be operational from 2027.

With a capacity of up to 24 MW and water-cooled high-density racks supporting up to 130 kW, it is perfectly suited for AI and high-performance workloads.

Multiple fibre optic connections ensure maximum connectivity, while a PUE of 1.2 and the use of 100% green electricity guarantee outstanding energy efficiency.

Secure your capacity now – get in touch with us!

# firstcolo

Datacenters and Managed Services

In its role as an operator of data centers in Germany, Frankfurt-based firstcolo GmbH offers its customers the utmost in service quality.

Alongside classic colocation and rental of server systems, our service spectrum also extends to security solutions, cloud services and managed services.
